## Key Product Risks

### Credit Risk

We underwrite the plan and you are subject to our credit risk. If we are unable to satisfy the financial obligations of the policy, you may lose your premium paid and benefits.

### Inflation Risk

Your current planned benefit may not be sufficient to meet your future needs since the future cost of living may become higher than they are today due to inflation. Where the actual rate of inflation is higher than expected, you may receive less in real terms even if we meet all of our contractual obligations.

### Failure to Pay Premiums Risk

If you do not pay the premium within 30 days of the premium due date, the policy will be terminated and you / the insured will lose the cover.

### Premium Adjustment Risk

In order to provide you with continuous protection, we will review the premium of your plan from time to time and adjust it accordingly upon policy renewal if necessary. During the review, we may consider factors including but not limited to the following:

- claim costs incurred from all policies under this plan and the expected claim outgo in the future;
- policy surrenders and lapses; or
- expenses directly related to the policy and indirect expenses allocated to this product.

For the avoidance of doubt, if any additional premium that has been added to your policy based on your disclosed risks (i.e. Premium Loading) and is set as a percentage of the standard premium (i.e. rate of Premium Loading), the rate will not change, but the amount of additional premium payable shall be automatically adjusted due to the change in standard premium.

Also, be assured that we will not impose any additional rate of Premium Loading or apply any new benefit exclusions due to any change in your health condition during the life of your policy.
